Writing

What is a habitat? Why do some wild animals have different habitats than others?

Science

Choose a wild animal and, with a trusted adult, research about its habitat. What type of plants are there? What other animals share its habitat? Where does it find food in its habitat?

Math

The lake is habitat for many wild animals and plants. Find out how many wild animals of each type are at the lake, if you know that there are 2 Bald Eagles. Some clues to finish the puzzle are below.

Each Bald Eagle needs 3 Bass to survive.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Each Bass needs 5 Pikeminnow to survive.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Each Pikeminnow needs 9 Crayfish to survive.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Each Crayfish needs 12 Algae plants to survive.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

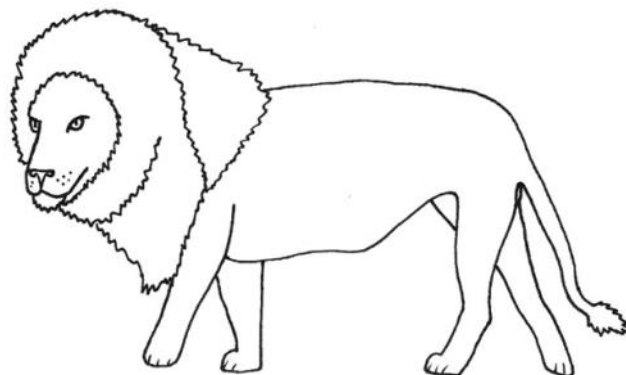

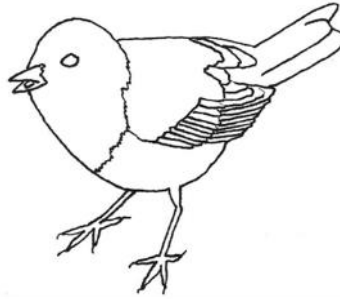

Fill in the blanks below:

2 Bald Eagles \leftarrow $\underline{\quad}$ Bass \leftarrow $\underline{\quad}$ Pikeminnow \leftarrow $\underline{\quad}$ Crayfish
 \leftarrow $\underline{\quad}$ Algae
