Math

There is one building with nine floors. How many windows does a this one building have have?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

How many windows does the big city have?

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

Small Town (*start over with colors*)

How many windows does a building with **one** floor have?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are **four** buildings with one floor. How many windows do all the buildings with one floor have in total?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

How many windows does a building with **two** floors have?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$
