Writing

What are the three steps you should follow if you find a wild animal that needs help?

that needs neip:
Math
Another way to help wild animals is to reduce, reuse and recycle! rees can be very important habitat for wild animals and they also put oxygen into the air which allows all living animals to breathe. If a family reduces their trash, they save 7 trees each year. If a family reuses items, they save 7 trees each year. If a family recycles, they save 7 trees each year. How many trees does a family save in a year if they reduce, reuse and recycle?
trees by reducing + trees through reusing + trees by recycling = total trees saved
2
